## **Mini Project**

### **Report**

**Semester: 4<sup>th</sup>**

**Group Members (B22):**

**Nevin Sunil Oommen – 44 2<sup>nd</sup> year CE**

**Paritosh Magare – 45 2<sup>nd</sup> year CE**

**Topic: Online Customer  
Feedback System**

## **Introduction:**

The Online Customer Feedback System is a web-based application designed to facilitate the process of collecting and managing customer feedback for products or services offered by a business. In today's highly competitive market, understanding customer opinions and sentiments is crucial for businesses to improve their offerings and maintain customer satisfaction. This project aims to create a platform where customers can provide feedback on products they have purchased, and businesses can analyze this feedback to make informed decisions and enhance their products or services.

The system allows customers to leave feedback, including ratings and comments, for specific products. Additionally, it provides a platform for businesses to view and analyze the feedback received, enabling them to identify areas for improvement and address customer concerns promptly. By implementing this Online Customer Feedback System, businesses can foster better relationships with their customers, drive product innovation, and ultimately increase customer loyalty and retention.

## **Objectives:**

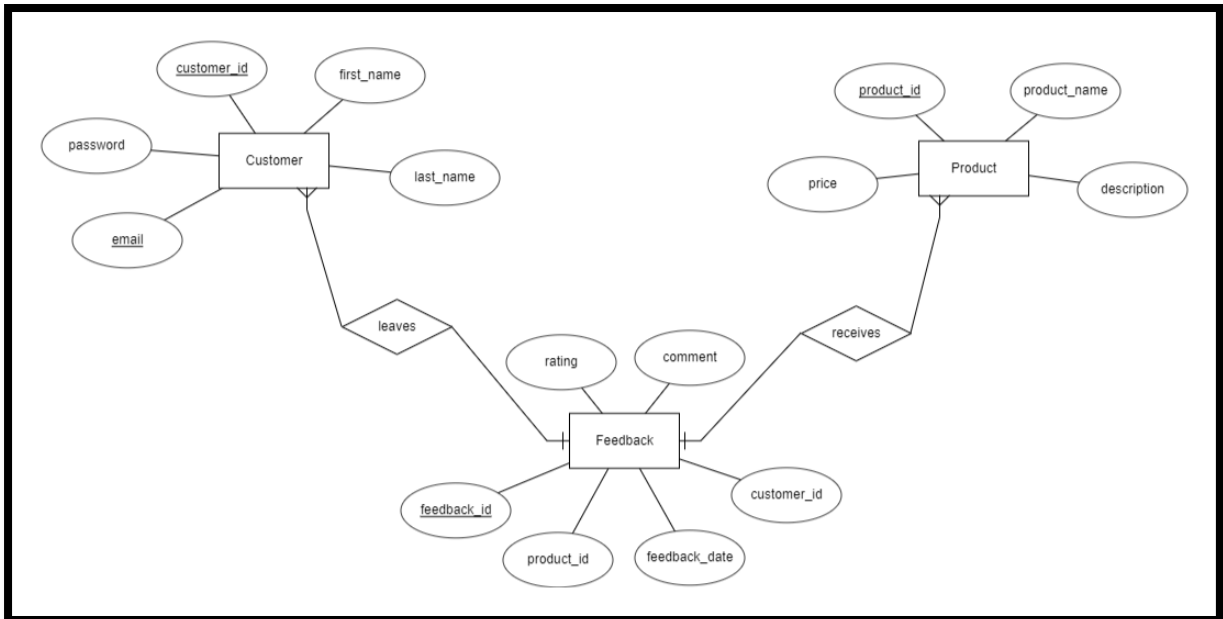

The Online Customer Feedback System project comprises the development of a web-based application to streamline the feedback collection process for businesses. The system consists of three main components: the frontend user interface, backend server-side logic, and a mySQL database using PHP for data storage.

The frontend interface provides users with intuitive navigation and user-friendly forms to leave feedback, and visualize existing feedback. It is built using HTML, CSS, and JavaScript, ensuring compatibility across various devices and browsers.

The backend logic, implemented in PHP, handles API requests from the frontend, retrieves data from the mySQL database, and performs necessary operations such as fetching products, retrieving feedback, and adding new feedback entries. It ensures seamless communication between the frontend interface and the database.

The mySQL database stores information about customers, products, and feedback entries, maintaining data integrity and enabling efficient data retrieval and analysis. It is designed with appropriate tables, constraints, and relationships to ensure optimal performance and scalability.

## Database Schema (ER Diagram)

### SQL Queries:

Table structure for table `poll`

```
CREATE TABLE `poll` (  
  `id` int(11) NOT NULL,  
  `name` text NOT NULL,  
  `email` text NOT NULL,  
  `phone` text NOT NULL,  
  `feedback` text NOT NULL,  
  `suggestions` text NOT NULL  
) ENGINE=InnoDB DEFAULT CHARSET=latin1;
```

Table structure for table `user`

```
CREATE TABLE `user` (  
  `id` int(11) NOT NULL,
```

```
`id` int(11) NOT NULL,  
`email` text NOT NULL,  
`password` text NOT NULL  
) ENGINE=InnoDB DEFAULT CHARSET=latin1;  
Dumping data for table `user`
```

```
INSERT INTO `user` (`id`, `email`, `password`) VALUES  
(1, 'Nevin&Paritosh', 'DBMS@123');
```

Indexes for dumped tables

Indexes for table `poll`

```
ALTER TABLE `poll`
```

```
ADD PRIMARY KEY (`id`);
```

Indexes for table `user`

```
ALTER TABLE `user`
```

```
ADD PRIMARY KEY (`id`);
```

AUTO\_INCREMENT for dumped tables

AUTO\_INCREMENT for table `poll`

```
ALTER TABLE `poll`
```

```
MODIFY `id` int(11) NOT NULL AUTO_INCREMENT;
```

AUTO\_INCREMENT for table `user`

```
ALTER TABLE `user`
```

```
MODIFY `id` int(11) NOT NULL AUTO_INCREMENT,  
AUTO_INCREMENT=2;
```

## Admin Login Page

A screenshot of an admin login page. The page has a dark blue background with a glowing network of red nodes and blue lines. In the center, there is a white rectangular area with a blue border. At the top of this area, it says 'LOGIN TO ADMIN ACCOUNT' in yellow. Below that, there are two yellow labels: 'USERNAME' and 'PASSWORD'. Under each label is a white input field. The 'username' field has the text 'username' inside, and the 'password' field has the text 'password' inside. At the bottom of the white area is a white button with the text 'Login' in blue.

## Conclusion:

Overall, the Online Customer Feedback System provides a comprehensive solution for businesses to collect, manage, and analyze customer feedback effectively. By leveraging this system, businesses can gain valuable insights into customer preferences and sentiments, driving continuous improvement and enhancing customer satisfaction.
